

AP Computer Science A Summer Assignment 2018

- 1) Join our Google classroom 8rsx72i
- 2) Please share your email with me at srood@delranschools.org so that I can communicate with you over the summer if need be. Feel free to communicate any questions or concerns the same way.
- 3) Check the APCS classroom during the summer, especially in early August, for announcements, assignments, hints for success, etc.
- 4) Register at greenfoot.org and complete the introductory tutorial. By introductory tutorial I mean the list that looks like this: Learn how to use Greenfoot and begin programming:
 1. [Interacting with Greenfoot](#)
 2. [Movement and Key Control](#)
 3. [Detecting and Removing Actors, and Making Methods](#)
 4. [Saving the World, Making and Playing Sound](#)
 5. [Adding a Randomly Moving Enemy](#)
 6. [How to Access One Object From Another](#)
- 5) Feel free to go further -- the Joy of Code videos linked on the same page of Greenfoot documentation look interesting (but you do not have to watch all 33!).
- 6) Have some fun this summer and I look forward to a successful year starting in September!
